

IP Digital Video Surveillance Systems

IP VIDEO SURVEILLANCE – IPVS THE INTELLIGENT SURVEILLANCE SYSTEM

Open platform IP video technology is dramatically increasing the capabilities and value of video surveillance. The benefits include everything from the ability to contain costs to freedom of choice in hardware/software and avoidance of equipment obsolescence.

Our leading edge video surveillance and security solution offers many important advantages over traditional CCTV based systems. These include:

- Higher video/image quality
- Fast Evidence Retrieval
- Larger video footage storage
- High degree of flexibility
- Unprecedented Scalability
- Remote accessibility
- Event management and intelligent video
- Easy future proofing
- Cost effective and higher Return On Investment
